## ACQUIRED IMMUNODEFICIENCY SYNDROME (AIDS): NINTH UPDATE

NEWARK PUBLIC LIBRARY
MAY 6 1986
U. S. GOVT. PUBS.
DEPOSITORY 378

January 1986 through March 1986

478 Citations

Prepared by Estelle J. Abrams

Updates and supplements Literature Searches Nos. 83-1, 83-5, 83-25, 84-9, 84-18, 84-32, 85-4, 85-16, and 85-20 covering January 1980 through December 1985.

Citations to all preclinical, clinical, epidemiologic, diagnostic, and prevention areas are included.

This bibliography contains references to recent articles selected from some 3,000 English and foreign language journals and a limited number of monographs. Articles from these journals and monographs are indexed for inclusion in *Index Medicus* and other bibliographies produced by the National Library of Medicine. The references in this Literature Search were retrieved from NLM's MEDLINE data base; the dates above show the period during which the references were added to MEDLINE.

Each citation is listed with the descriptors selected from NLM's list of Medical Subject Headings (MeSH) under which the article was indexed. MeSH descriptors of most significance in an article are identified with an asterisk. The article cited will be found in *Index Medicus* only under these starred descriptors.

A bracketed title indicates the article is in a foreign language. For foreign language articles the designation ENG.ABSTR. follows the publication date if the article includes an English abstract; language abbreviation in parenthesis follows.

A full explanation of the elements included in each citation, as well as a complete list of current NLM Literature Searches are included in *Index Medicus and Abridged Index Medicus*. To obtain a current list of Literature Search titles, write: Literature Search Program, Reference Section, National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland 20209. Please include your name and address typed on a gummed label (no return postage necessary).

## SEARCH STRATEGY

**The formulation used in preparing this bibliography is given below. Please note that strategies for the Literature Searches differ from individual demand searches in that they are generally broadly formulated and irrelevant citations edited out prior to printing.**

SS1 = ACQUIRED IMMUNODEFICIENCY SYNDROME OR
HUMAN T-CELL LEUKEMIA VIRUS AND III (TW)

SS2 = (TW) HTLV AND III OR LYMPHADENOPATHY AND
ASSOCIATED AND VIRUS OR AIDS AND RELATED AND
COMPLEX OR LAV

SS3 = 1 OR 2

SS4 = 3 AND GREATER THAN 851025
